Email: [asadamin236@gmail.com](mailto:asadamin236@gmail.com)

LinkedIn: <https://bit.ly/46EspkH>

Github: <https://github.com/asadamin236/>

Address: Karachi Pakistan

A greatly dedicated person pursuing their better carrer in the field of Data Science, Machine Learning and Data Analysis where my skills will be best utilized for my career growth and benefits of the organization.

---

## Skills

**Python** (Numpy, Pandas, Matplotlib, Seaborn, Scikit-Learn)

**Microsoft Excel** (Power pivot, Conditional Formatting, Data Visualization etc)

**Microsoft PowerBI** (Analyzing, Visualizing and transforming data)

**MySQL** (Joins, Aggregations and large queries)

---

## Education

Bachelor's degree in **Computer Science** from **Iqra National University Peshawar**

(2017-2021)

---

## Experience

Data Analyst Internship (Mar-2022 to May-2022) at BrainsPK Software Company

- In that internship I would analyze data and then create reports from that data
- By the using of different tools and technologies like python, Microsoft excel, PowerBI and MySQL.

---

## Projects

### Sales Analysis Dashboard using Microsoft Excel:

- In that Dashboard I use excel to visualize the data and create reports
- In that report I watch full products and its sales profit
- And also watch top 5 max orders of products

### Heart Attack Prediction Using python

- In this project I use data preprocessing, visualization and machine learning libraries like (Numpy, Pandas, Matplotlib, Scikit-learn)
- I collect data from kaggle data science and machine learning platform.
- Then run it clean and visualize and then use train test split to divide it into two groups train and test and then use machine learning algorithms like (knn, Random Forest Classifies, Decision Tree Classifies, Logistic Regression)
